INTRODUCTION

Machine Learning prodigy and computer science student with a strong foundation in programming, game development, and AI.

PROJECTS

Email Spam Detector

Developed an email spam detector using React and Flask, implementing various models to enhance email security and filter accuracy.

Pose Detection

Developed an AI system for detecting hand, face, and leg movements using Deep Lake dataset and CNN models.

Stock Price Predictor

Built a deep learning model to predict stock prices using TensorFlow, Keras, Pandas, and LSTM neural networks.

CookCraft

Created a meal and recipe planning app with AI-based recommendations using React Native, Node, Express, MongoDB, and SkLearn.

Tutionwalay.com

Developed a web application using HTML, CSS, and JavaScript for the front-end, and utilized the Spring Boot framework in Java for the back-end.

Game Development

Developed multiple games using C++ and Unity.

Ride Management System

Built a console-based desktop app for ride management using C++ with OOP concepts.

Catch-It

Using the core concepts of Assembly language, developed a game comprising of different levels

Saughat

Built a fully functional Web app which allowed users to order regional delicacies

BOOTCAMPS

Internet of Things by Grandeur

Completed an IoT project and presented products to investors at an event hosted by Grandeur.

Machine Learning Bootcamp

Participated in a bootcamp focused on supervised learning in biomedical contexts, hosted by Soliton.

ML Course by Stanford and Deep Learning

Gained knowledge of various supervised and unsupervised learning techniques.

EDUCATION

2021 - present BSCS at **FAST NUCES Lahore** (GPA: 3.5/4.0)

2019 - 2021 Intermediate at **GCU Lahore**

2017 - 2019 **PISR** Saudi Arabia

VOLUNTEER WORK

Stacks Pakistan

EFE Pakistan

Nawab Begum Trust

SKILLS

Programming Languages	Python, C++/C, JS, Node
Databases	mySQL
Software Development	Git/Github, Trello Board
Frontend Development	React Native, MUI, Tailwind, Bootstrap
Design	Figma
